STATE WATER RESOURCES CONTROL BOARD

ORDER

APPLICATION 14991

PERMIT 9201

LICENSE 5305

ORDER CORRECTING THE PURPOSE OF USE AND POINT OF DIVERSION

WHEREAS:

1. License 5305 was issued to Howard C. and Louise E. Richardson and was recorded with the County Recorder of Nevada County on July 16, 1958 in Book 798, Page 262.
2. License 5305 was subsequently assigned to James Newman and Judith K. Newman.
3. A request to correct the purpose of use and place of use has been filed with the State Water Resources Control Board and said Board has determined that good cause for such change has been shown.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The purposes of use under this license shall be as follows:
Recreational, Fish and Wildlife Enhancement and Fire Protection
2. The place of use under this license shall be as follows:
At reservoir within NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 5, T16N, R7E, MDB&M.
3. The paragraph pertaining to the continuing authority of the Board is replaced with the following:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights privileges under this license are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable

water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

4. The following paragraph 4 is added to this license:

After the initial filling of the storage reservoir, permittee's right under this permit extends only to water necessary to keep the reservoir full by replacing water lost by evaporation and seepage, and to refill if emptied for necessary maintenance or repair. Such right shall be exercised only during the authorized diversion season.
